

AutoSafe Compliance & Liability Audit Checklist

Use the checklist below to establish if you have potential health and safety problems. If you do answer no to any one of these questions then you have some work to do to assure legal compliance, if you want to know what you need to do call C&G Services and we'll tell you - no charge applies!

Email post@cgserv.com, Fax it to us on 01453 792123 or call one of our consultants free on 0800 731 2989

	Question	Yes	No
1	<p>Have you formulated a statement of safety policy giving detail to your commitments for safety and assigning responsibilities to staff, further is this document signed by the most senior partner and prominently displayed?</p> <p><i>This is required under the Health and Safety at Work Act</i></p>	<input type="checkbox"/>	<input type="checkbox"/>
2	<p>Have you carried out risk assessments for tasks in your business and more importantly, have you recorded the conclusions to these assessments and taken any precautions specified?</p> <p><i>This is required under many separate regulations such as the Manual Handling Regulations 1992 but there is a coverall requirement under the Management Regulations 1999</i></p>	<input type="checkbox"/>	<input type="checkbox"/>
3	<p>Have you educated your staff on the safe methods of work connected with the business? (These can range from using chemicals through to vehicle lifts)</p> <p><i>The results of risk assessments must be communicated to your staff if precautions deemed appropriate to comply with the law need to be taken</i></p>	<input type="checkbox"/>	<input type="checkbox"/>
4	<p>Have you appointed a competent health and safety advisor who is adequately trained and able to advise you on safety issues? (this person can be external to your organisation if you have a formalised relationship)</p> <p><i>The law recognises that you may need assistance and you can appoint an external advisor such as ourselves but you must have access to competent assistance. Management Regulations Regulation 7.</i></p>	<input type="checkbox"/>	<input type="checkbox"/>
5	<p>Have you looked at the chemicals and substances used in the business and conducted COSHH Assessments, recorded their findings and acted on them?</p> <p><i>The COSHH Regulations require risk assessment and the Management Regulations require that risk assessments are recorded and communicated.</i></p>	<input type="checkbox"/>	<input type="checkbox"/>
6	<p>Have you consulted with your staff on safety matters and given them the opportunity to comment on issues affecting their safety?</p> <p><i>The Consultation with Employees Regulations 1997 require that employees are consulted on issues which affect their safety at work.</i></p>	<input type="checkbox"/>	<input type="checkbox"/>

7 Do you display and have you filled out the Health and Safety Law poster?

The poster is a statutory requirement and must be displayed and filled in correctly, it must also be of the correct type and was last updated in 1999.

--	--

8 Do you have an accident book and RIDDOR report forms (F2508) and are they easily available to staff and used to record all incidents (some are reportable by law)?

The Reporting of Injuries Diseases and Dangerous Occurrences require that you make an immediate report of certain events, failure to do this is a criminal offence.

--	--

9 Do you have a First Aid Kit and are the contents of this kit adequate for the numbers of staff employed and the risks evident in your business, for example chemical spills?

A first aid kit must be in place and adequately stocked - call us for a checklist.

--	--

10 Have you appointed and trained staff to give first aid and are these staff available in sufficient numbers to cover sickness absence and annual leave?

Check that you have cover at all times of the day and remember that renewals need to be performed at least once every 3 years.

--	--

11 Do you have fire fighting equipment of the right type, in the right place and of sufficient number?

If a fire occurred do staff have the right equipment to protect themselves against harm. Fire Precautions (Workplace) Regs 1997.

--	--

12 Do your staff know how to use these extinguishers?

Use of a water or foam extinguisher on an electrical fire could result in electrocution.

--	--

13 Do you have systems in place to ensure that all staff, visitors and customers are safely evacuated?

If there was a fire or other emergency are you sure that all of your staff would safely evacuate, and could you prove this to the Fire Service - if not they could be forced to search the building at great personal risk.

--	--

14 Do you test equipment periodically through the use of a competent body? (examples are air compressors, lifts and hoists and fork lift trucks)

Required by Law at certain statutory periods. Inspection must be formal, thorough and by a suitably qualified person.

--	--

15 Do you have a system in place to test portable electrical appliances such as scales, computers and monitors?
Electrical safety can be a serious hazard and tests must be conducted regularly to ensure that shocks and fire risks are managed.

--	--

16 Is your company registered with your Enforcing Authority?
It is your responsibility to ensure this, if you have never received a visit or have recently started your business or perhaps moved premises you may need to update the HSE or Local Authority Environmental Health Office.
