

Chartered Safety and Health Practitioner*

Group CV and competence / experience summary Outsource Safety, March 2017

We provide expert health & safety consultancy and interim and outsourced support for internal health and safety teams. We work with organisations throughout the UK and beyond. Our safety consultants are all specialists in their field with many years of practical experience.

Roger Hart   Chartered Safety and Health Practitioner
Registered Consultant

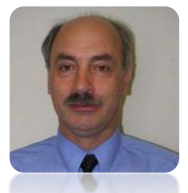

BSc (Hons) MSc CMIOSH CSHP

Roger, a Chartered Safety & Health Practitioner with IOSH and OSHCR Registered Consultant, has been involved with the company from the start. He has over 20 years' health & safety consultancy experience in industries ranging from retail and leisure through to heavy industry. He can advise on complex COSHH risk assessment issues such as isocyanates, welding fumes and solvents. Roger brings great interpersonal, communication and organisational skills plus a wide-ranging theoretical and practical knowledge of health and safety.

Key competencies: Sampling of airborne hazardous substances including welding fumes / solder fumes / isocyanates / kerosene / styrene / solvents / tributyl phosphate / etc. Industrial safety, COSHH risk assessment, occupational health training sessions, interim and outsourced safety management, assessment of contractors, specific risk assessments, safety auditing, occupational health, noise assessment.

Sector experience: oil and gas, aerospace, transport, defence (including EM385), construction, utility and energy, renewables, engineering, manufacturing, retail and leisure, facilities management / building services.

Steve Bentley   Chartered Safety and Health Practitioner
Registered Consultant

DipSM. CMIOSH, CSHP, Industrial Safety Specialist, OSHCR Registered Consultant

Steve has worked in the manufacturing industry for many years and has travelled throughout Europe and Scandinavia carrying out safety audits, providing technical advice, developing health & safety policies and delivering safety training programmes. He has more than 26 years of experience co-ordinating safety within an International business and is able to work within contracting trades as well as the engineering sector. His vast experience is particularly relevant in helping our larger clients to promote safety cost-effectively. Steve has brought companies to full five star audit and Sword of Honour status through health and safety policy development and audit.

Key competencies: Audit of procedures and review to 5 star audit / Sword of Honour level. Safety implementation in multi-site and multi-national concerns. Reporting and information management and KPI's for multi-site operations. Public sector safety management and procedure development

Sector experience: Public sector bodies, light and heavy industrial, engineering and manufacturing. Facilities management. Care and primary care sectors including NHS. Contracting trades including electrical, plumbing and building services.

Chartered Safety and Health Practitioner*

Graham Pritchard

TechIOSH, Safety, Quality & Environmental Consultant

Graham has vast experience in industry with a broad spread of skills, from the management of safety within large organisations to the implementation of environmental management and consultancy programmes to ISO 9001 / 14001 and OHSAS 18001. Graham has a particular specialism in the automotive and engineering sectors where his breadth of knowledge and experience has proved of great value to our clients. A highly experienced management systems specialist with strong skills in health and safety policy development and auditing.

Key competencies: Implementation of management systems including OHSAS 18001, ISO14001 and ISO9001. Development and management of QHSE safety management systems. Safety policy development and risk assessments specific to your requirements with first-hand experience of Tier 1 suppliers into automotive.

Sector experience: Automotive engineering, plastics and fashion sectors. Outsourced support and interim management support for various clients in industrial, engineering and manufacturing. Industrial and heavy industrial safety management. Aerospace and high value manufacturing and engineering. Contracting trades including electrical and building services.

Phil Chambers

CMIOSH, CSHP, Systems Specialist, Quality, Safety and Environmental Consultant

Phil has a huge amount of experience gained within production and engineering environments and has worked worldwide helping companies implement, develop and then refine their safety management systems. He has completed implementation of ISO14001, OHSAS18001, ISO9001 and also FSC/FEPC management systems with his current tally nearing 200 successful projects. He is also a Chartered Safety and Health Practitioner.

In addition he is a capable Health, Safety, Environmental and Process Safety Auditor and also a skilled Occupational Hygienist and Noise Assessor. Other qualities include his mentoring abilities and implementation of robust procedures to support businesses where they require a particular focus on specific areas of their HS&E management controls.

Key competencies: Control of Substances Hazardous to Health (COSHH), CE marking support for machinery suppliers / manufacturers, OHSAS 18001, ISO14001 Management Systems, Advanced Auditor, Ergonomic Assessor, Provision and Use of Work Equipment Assessor (PUWER)

Sector experience: High tech engineering industries, printing, aircraft landing gear systems, manufacturing, engineering, casting and molten metals, motor vehicles, education, defence.

Chartered Safety and Health Practitioner*

OUTSOURCE SAFETY

Peter Hebblethwaite Registered Consultant

CMIOSH, CSHP Industrial Safety Specialist

Peter has a huge amount of experience gained firstly within production and engineering environments and has worked with a diverse range of other businesses over the past 20 years including the NHS and other healthcare sector organisations, construction groups, waste management and recycling, aggregates and estate management.

Peter has worked at the highest level to implement and mentor staff within large organisations on successful health and safety management. He has developed and delivered bespoke and externally accredited training programmes working alongside Senior Management Teams, Boards of Trustees, Directors, Managers and other key stakeholders.

Sector experience: High tech engineering industries, contracting, agriculture, printing, manufacturing, engineering, casting and molten metals, motor vehicles, education, defence, fire safety

Derek Purchase Registered Consultant

BSc (Hons), DipNEBOSH, SpDipEM, CMIOSH, MIIRSM, RMaPS, Construction Safety Specialist, Principal Design Consultant (CDM), OSHCR Registered Consultant

Derek has worked for a number of large contractors on some very high profile and high value projects. With over 30 years' experience in the construction industry he has the skills and experience to assist major contractors at the highest level providing services, including Principal Design Consultant (CDM), on large projects in excess of £500m. He has a degree in civil engineering from Loughborough University plus many years involved specifically in construction site safety. He is a hands on practical safety professional with excellent inter personal skills.

Key competencies: Construction specific safety management systems and reporting to OHSAS 18000. Mixed retail developments in high profile locations up to £500m. Interim and outsourced safety management support. Expert site audit and staff development. Principal Design Consultant (CDM) services and development of specific RAMS and construction phase safety plans. Demolition of various structures plus dismantling. Assistance US business and US and UK defence projects including experience of US Department of Defence EM385.

Sector experience: House building and major developments including mixed retail and commercial. Defence including US DoD EM385. Utility groups and networks including water. Retail and shop fitting. Renewables including PV/Solar farms.

Chartered Safety and Health Practitioner*

OUTSOURCE SAFETY

Chartered Safety and Health Practitioner

Registered Consultant

[Jason Garrens](#)

BSc (Hons), CMIOSH, CSHP, Construction Safety Specialist, Principal Design Consultant (CDM)

Jason has over 18 years consultancy experience working within the petrochemical, site development, demolition and construction industries within Western Europe and Australia. He is degree qualified in Risk Management and qualified to full CMIOSH level. He has a wealth of experience within the hazardous industries and has covered construction project safety and site safety visits for a range of sectors including nuclear, rail, utilities, petroleum gas and construction. Jason takes a practical approach to site safety issues and his sound working knowledge ensures that the safety message gets through to staff at all levels.

Key competencies: Outsourced support of site development, ground work and house building clients. Completion of site visits and audits. Development of specific method statements and risk assessments including deep excavations plus contract safety packs. Inspection of scaffolding and related access equipment. Toolbox talks and training sessions for site staff and management.

Sector experience: Oil and gas, construction, demolition, nuclear, waste, utilities, site acquisition and divestment, transport, rail, defence, engineering, manufacturing and facilities management / building services.

Chartered Safety and Health Practitioner

Registered Consultant

[Tony Leibrick](#)

CMIOSH, CSHP, Construction Safety Specialist, Principal Design Consultant (CDM)

Tony is an experienced 'hands on' Chartered Occupational Safety and Health Professional. He has over 16 years experience of working in a wide variety of industries, mainly on large construction and civil engineering projects but also in Steel Processing Plants, Workshops, Facilities Management, PFI, Water industries and Defence Projects both in the UK and internationally.

The majority of the roles have been as Health and Safety Manager or Health and Safety Advisor for major construction companies responsible as the principal contractor. Skills include ensuring that project management teams are fully compliant with Health, Safety, Security and Environmental policies, procedures and legal requirements by strategising inspection and auditing schedules to ISO 14001/ISO 18001 standards.

Key competencies: Outsourced support of site development, ground work and house building clients. Management Systems Auditor/Lead Auditor, ISO18001 & 14001. Abrasive Wheels Trainer, New Road and Street Works Act Supervisor (NRSWA). Completion of detailed site visits and audits including environmental management objectives. Development of specific method statements and risk assessments including deep excavations plus contract safety packs. Inspection of scaffolding and related access equipment. Toolbox talks and training sessions for site staff and management.

Sector experience: Major Re-enforced Concrete, (RC) Major Insitu RC, Steel Frame Construction, Formwork, Pre-cast, Traditional Block & Brick, Timber framed, Environmental Friendly Projects, Major Civil Engineering and Highway Projects, general construction, demolition, defence, PFI projects, water industry and utilities, waste, site acquisition and divestment, transport, engineering, manufacturing and facilities management / building services.

Chartered Safety and
Health Practitioner

George Boyd Registered Consultant

CMIOSH, Construction Safety Specialist, Principal Design Consultant (CDM)

George is a Chartered Member of the Institute of Occupational Safety and Health, he also holds a NEBOSH Environmental Management Diploma. As well as his Qualifications, George has over 10 years of consultancy experience as a Health & Safety professional. He provides H&S advice to a range of clients mostly in the construction industry but also covers clients who operate in agriculture, forestry and other areas. George is also an experienced Principal Design Consultant (CDM).

George has good interpersonal skills and communicates well with client staff at all levels. He is robust in his approach to Health & Safety on sites but this is balanced with a desire to support and advise the client to allow them to reach a practical solution which complies with relevant legislation and promotes good H&S practice. George has worked as the Health & Safety consultant on a project to transform a former Woolworth store into council offices; the refurbishment and new builds of 4 schools; deforestation project at a wind farm in Perthshire; and many other new build and refurbishment projects throughout Scotland.

Key competencies: Principal Design Consultant (CDM) services and development of specific RAMS and construction phase safety plans. Interim and outsourced safety management support. Expert site audit and staff development.

Sector experience: House building with major clients, city centre office, retail and mixed development. Schools and major public building projects. Commercial structures. Renewables including wind farms, biomass, solar and combined heat and power schemes. Large steel frame structures and factory installations, demolition and dismantling. Combined heat and power installation. Contracting trades including electrical and building services
