

HR Partners
We work with our partners to offer a complete solution which tackles all of your safety and HR issues within one simple partnership known as EmployerGuard. By linking with HR specialists and our occupational health partners we can work seamlessly together to manage staff with ill health back into the business

Occupational Health Partners
We work closely with our partners across all sectors, from office based staff who have experienced ill health or mental health issues through to those operational staff who may develop back pain, dermatitis or sensitisation. Through working together we can successfully manage illness in your business and get staff back into your workplace.

Insurance Partners
Risk management aligns us perfectly with the insurance industry and we have successfully brokered partnerships which have made us cost neutral for our clients. Through working to internationally recognised standards such as OHSAS18000 we can ensure that safety provides protection for your senior management teams and a big impact on your bottom line, talk to us to find out more

Plant Equipment, MHE & Skills Training Partners
From excavators to window cleaning cradles and specialist course development our partners have the skills and capacity to deliver across the UK and beyond. We work with you to ensure effective and value driven training to close out all compliance issues quickly and cost effectively

Management Training Partners
The key driver of health and safety within any business will always be senior management. From behavioural safety training for the Board through to IOSH or CITB training for staff at all other levels we can ensure the delivery of a tailored programme which delivers results.

Electrical Training Partners
We work closely with a major provider who has a national reach and huge experience in the industry. From renewables businesses entering the UK market and wishing to cross train and certificate their staff through to building services specialists engaging in live work we can provide the solution.
